

Become a Sponsor for MESA Day 2021 May 18–20th

Oregon MESA equips teachers to help underserved middle and high school students excel in STEM through hands-on invention education. With our programs, more marginalized and low-income students not only graduate from high school, but also enroll in post-secondary studies and enter the workforce with STEM, 21st century and invention skills — fueling the innovation economy with diverse, talented leaders.

The MESA Day competition is our signature event and reaches hundreds of students annually. At the event, students engage in hands-on competition, career exploration, and college preparation. In 2021, MESA Day will be held virtually May 18-20th and students will continue to receive all of these components. Each student will be receiving a box with materials to participate in the week of activities. As part of MESA Day, Oregon MESA will also be hosting the Future Innovators Celebration to recognize MESA's graduating seniors and other notable members within the MESA community.

By becoming a sponsor, your support will go towards supporting this event and will also provide us with the resources to impact more schools, increase access for more students, and inspire the next generation of STEM leaders.
